#### **EXPLANATORY NOTES**

- 1. Source of Data: Import documents collected by Customs are the basic source of import statistics, except for data on imports of electricity and on imports of aircraft imported for use as international carriers. These two types of imports are reported by the importing firms directly to the Dominion Bureau of Statistics.
- 2. Time Periods: Import statistics for any month include all goods declared on import entries received at DBS during the calendar month, and on electricity reports received within the following calendar month. There is usually a lapse of one to two weeks between the actual customs clearance of imports and receipt of the relevant documents in DBS. Electricity imports are usually included in statistics for the month in which these imports actually occurred. Reports on aircraft imported as international carriers are received quarterly, but the aircraft can usually be included in statistics for the month in which the imports actually occurred.
- 3. Coverage: From January 1, 1964, import statistics have included all goods which are cleared by Customs immediately on arrival in Canada, plus goods which are entered into customs warehouses on arrival. For 1963 and earlier years import statistics included goods cleared immediately on arrival plus goods cleared for consumption out of customs warehouses. The two types of record eventually cover the same totals. except for a small amount of goods which is entered into customs warehouses and then re-exported. There may, however, be an important difference in the time at which warehoused goods are recorded as imports; some shipments which enter customs warehouses remain there for several months before clearance. A more detailed discussion of this change appears on one of the blue pages included in the January, 1964 issue of this report.

The following commodity movements are excluded from import statistics (some are recorded separately as Special Transactions-Non-trade in Table 4): gold and gold products where the value of the gold content is 80% or more of the total value except for dental gold

#### NOTES EXPLICATIVES

- 1. Source des données: La statistique des importations se fonde principalement sur les documents d'importation recueillis par les Douanes, sauf dans le cas des importations de l'électricité et les importations des avions devant servir de transporteurs internationaux. Ces deux catégories d'importations sont déclarées directement par les compagnies importatrices au Bureau fédéral de la statistique.
- 2. Périodes de temps: La statistique des importations pour un mois quelconque comprend toutes les marchandises déclarées dans les documents d'importation parvenus au B.F.S. durant le mois civil et dans les rapports sur l'électricité recus durant le mois civil suivant. Il y a ordinairement un décalage d'une à deux semaines entre le dédouanement effectif des importations et l'arrivée des documents qui s'y rapportent au B.F.S. Les importations d'électricité sont ordinairement comprises dans la statistique du mois où elles ont effectivement eu lieu. Les rapports sur les avions importés comme transporteurs internationaux sont regus tous les trois mois, mais les avions peuvent ordinairement être inclus dans la statistique du mois où ils ont été importés.
- 3. Couverture: La statistique des importations comprend, depuis le 1er janvier 1964, toutes les marchandises dédouanées dès leur arrivée au Canada plus les marchandises entreposées à la douane à leur arrivée. Pour 1963 et les années antérieures. la statistique des importations comprend les marchandises dédouanées dès leur arrivée plus les marchandises dédouanées des entrepôts de la douane pour consommation. Eventuellement, les deux formes de documents donnent les mêmes chiffres, sauf dans le cas d'une petite quantité de marchandises entreposées à la douane et ensuite réexportées. Il peut y avoir, toutefois, une grande différence entre le moment où les marchandises sont entreposées et celui où elles sont consignées comme importations; certaines marchandises entreposées à la douane attendent leur dédouanement pendant plusieurs mois. Une explication plus détaillée du changement paraît sur l'une des pages bleues insérées dans le rapport de janvier 1964.

Les mouvements de marchandises suivants sont exclus de la statistique des importations (certains sont classés séparément comme Transactions spéciales-hors commerce au tableau 4): l'or et les articles en or dont la valeur de la teneur en or représente 80 p. 100 ou plus de la alloy (class 880-27) and a small amount of gold scrap in the form of jewellers' sweepings (class 258-99); current coin; settlers' effects: private donations and gifts; tourist purchases exempt from duty; goods imported by foreign armed forces or diplomats stationed in Canada or brought back by Canadian armed forces or diplomats returning from postings outside Canada; temporary imports for exhibition or competition, and most goods imported for Expo 67; and film imported for exhibition or processing or returned after exhibition or processing abroad; ships of British construction and registry imported for use in Canada, and ships purchased for use as international carriers but not used to carry goods between points in Canada; bunker supplies and ships' stores purchased by Canadian vessels or aircraft abroad; generally, all temporary imports and goods merely moving in transit through Canadian territory. Until January 1, 1966, aircraft purchased for use as international carriers and not used to carry goods between points in Canada were also excluded.

- 4. Countries Credited: Imports are credited to the country in which the goods were located when first directed to Canada, except for goods produced in Central or South America but first consigned to Canada from the United States, which are credited to the country of origin.
- 5. Quantities: Tables 3 and 4 show quantities in terms of the units specified for each class in the Import Commodity Classification, Vol. I (DBS Catalogue No. 12-524). Where no unit of quantity is specified, the quantity columns are empty.

Units of weight or volume relate to the weight or volume of the goods, and exclude the weight or volume of any packing required for shipment except in certain special cases otherwise defined in the Customs Tariff. Units of number refer to the number of complete (or substantially complete) units imported, excluding parts (for any class where the recorded value includes both complete units and parts of these units, the average value per complete unit can not be calculated). All units of quantity used in this report are defined on page 7.

valeur totale, sauf les alliages d'or dentaire (classe 880-27) et une petite quantité de déchets d'or sous forme de balavures de bijoutiers (classe 258-99); la monnaie courante; les effets d'immigrants; les dons et cadeaux privés; les achats des touristes exempts de douane; les marchandises importées par les forces armées ou les diplomates étrangers en poste au Canada ou rapportées par les forces armées ou les diplomates canadiens rentrant de leur service hors du Canada; les importations provisoires pour expositions et concours, et la plupart des marchandises importées aux fins de l'Expo 67; les films importés pour projection ou développement ou retournés à l'étranger après projection ou développement; les navires de construction et d'immatriculation britanniques importés pour usage au Canada, et les navires achetés pour usage comme transporteurs internationaux et non pour le transport de marchandises d'un endroit à un autre au Canada; les approvisionnements de soute et de bord achetés à l'étranger par les navires et les avions canadiens; en général toutes les importations provisoires et les marchandises ne faisant que passer par le territoire canadien. Jusqu'au 1er janvier 1966, les avions achetés comme transporteurs internationaux et non pour le transport de marchandises d'un endroit à un autre au Canada étaient aussi exclus.

- 4. Pays de provenance: Les importations sont créditées au pays où les marchandises étaient situées avant leur acheminement vers le Canada, sauf les marchandises produites en Amérique centrale ou en Amérique du Sud et expédiées au Canada des États-Unis, lesquelles sont attribuées au pays d'origine.
- 5. Quantités: Les tableaux 3 et 4 donnent les quantités suivant les unités déterminées pour chaque classe dans la "Classification des marchandises d'importation", vol. 1 (B.F.S. numéro de catalogue 12-524). Lorsque l'unité de quantité n'est pas mentionnée, les colonnes de quantité demeurent en blanc.

Les unités de poids ou de volume visent le poids ou le volume des marchandises à l'exclusion de l'emballage nécessaire à l'expédition, sauf dans certains cas spéciaux définis dans le tarif douanier. Les unités de nombre visent le nombre d'articles complets (ou suffisamment complets) importés, sauf les pièces de rechange (dans toute catégorie où la valeur inscrite comprend les unités complètes et leurs pièces, la valeur moyenne par unité complète ne peut être calculée). Toutes les unités de quantité employées dans le présent rapport sont expliquées à la page 7.

6. Values: Export entries define the value of exports as the "actual amount received or to be received in terms of Canadian dollars, exclusive of all charges" (freight, insurance, handling, etc.). This definition would give values f.o.b. point of consignment for export, but in practice it is not always followed. For example, in recent years a significant but indeterminate proportion of exports has been reported in United States dollars.

All values appearing in this report are presented in thousands of dollars. Where the cumulative value of exports in any commodity class (or group) to a particular country is less than \$500, no line for that country is printed in the report. Where the cumulative value is more than \$500 but the value for the current month is less than \$500, a line is printed but no value appears in the current month column. In such cases current month quantities are printed even though no value is shown for the month. All totals and cumulative values are calculated from unrounded figures and rounded independently; they will therefore often differ from the sum of the rounded figures shown in the report.

- 7. Abbreviations: Many descriptions of countries and commodities used in this report are abbreviated or incomplete. A key to abbreviations of countries appears in this report, and full descriptions of all commodities and commodity groups appear in the "Export Commodity Classification, Vol. 1. The letters "n.e.s." mean "not elsewhere specified".
- Revisions: All statistics in this report are subject to revision. Revisions to previous reports are published on coloured pages at the beginning of this report quarterly.

6. Valeurs: Les documents d'exportations définissent la valeur des exportations comme "la somme réelle reçue ou àrecevoir en dollars canadiens, à l'exclusion de tous les frais" (de transport, d'assurance, de manutention, etc.) Cette définition établirait donc la valeur des exportations f. à b. point de destination, mais on réalité, on ne la respecte pas toujours. Par exemple, au cours des dernières années une proportion importante mais indéterminée des exportations a été déclarée en dollars américains.

Toutes les valeurs qui paraissent dans le présent rapport sont indiquées en milliers de dollars. Lorsque la valeur cumulative des exportations dans une catégorie (ou groupe) quelconque vers un pays en particulier n'atteint pas \$500, alors ce pays ne paraît pas dans le rapport. Lorsque la valeur cumulative est supérieure à \$500, et la valeur touchant le mois en cours est inférieure à \$500. le rapport n'indique aucune valeur dans la colonne du mois en cours: une valeur est indiquée, cependant, dans la colonne de la valeur cumulative. Dans ces cas-là, les quantités du mois en cours sont indiquées même si la valeur ne l'est pas. Tous les totaux et les valeurs cumulatives sont calculés à partir de chiffres non arrondis qui sont ensuite arrondis indépendemment en milliers de dollars; ces valeurs ainsi obtenues peuvent souvent différer de la somme des valeurs arrondies figurant dans chaque rapport mensuel.

- 7. Abréviations: Plusieurs descriptions de pays et de marchandises utilisées dans le présent rapport sont abrégées ou incomplètes. La clef aux abréviations visant les pays est donnée dans le présent rapport, tandis que les descriptions complètes des catégories et des groupes de marchandises paraissent dans la "Classification des marchandises d'exportation, Vol. I". Les lettres "n.d.a." signifient "non dénommé ailleurs".
- 8. Rectifications: Toutes les données statistiques contenues dans le présent rapport sont sujettes à rectification. Les rectifications apportées aux rapports antérieurs paraissent dans les pages en couleur au début de ce rapport trimestriel.

## UNITS OF QUANTITY

## UNITÉS DE QUANTITÉ

BBL	Volume in barrels.	BOISS	Volume en boisseaux.
BU	Volume in bushels.	BRL	Volume en barils.
CARAT	Weight in carats.	CARAT	Poids en carats.
CORD	Volume in cords.	CORDE	Volume en cordes.
CWT	Weight in units of 100 lb.	DOUZ	Nombre de douzaines.
CWT N	Weight of contents in units of 100 lb. (containers excluded).	D PRE	Nombre de douzaines de paires.
DOZ	Number of dozens.	GALL	Volume en gallons canadiens.
DZ PR	Number of pairs in dozens.	GAL P	Volume du contenu alcoolisé en gallons canadiens de preuve.
FT	Length in linear feet.	GR	Nombre en grosses.
GAL	Volume in Canadian gallons.	KILO	Poids en kilogrammes.
GROSS	Number of gross.	LIV	Poids en livres.
KG	Weight in kilograms.	LIV N	Poids du contenu en livres (récipients exclus).
LB	Weight in pounds.	М	Nombre en milliers.
LB N	Weight of contents in pounds (containers excluded).		Milliers de kilowatts-heure.
м	Number in thousands.	M PCU	Volume en milliers de pieds cubes.
мвг	Volume in thousand board feet.	м Р Р	Volume en milliers de pieds planche.
M C F	Volume in thousand cubic feet.	NOMB	Nombre.
M KWH	Thousand kilowatt hours.	ONCE	Poids en onces.
NO	Number.	ON TR	Poids en onces troy.
oz	Weight in ounces.	PAIRE	Nombre de paires.
PACK	Number of packs.	PAQ	Nombre de paquets.
PAIR	Number of pairs.	PC 1/4	Volume en pieds carrés de 1/4 de pouce d'épaisseur.
P GAL	Volume of alcoholic content in Canadian gallons of the	PI	Longueur en pieds linéaires.
P	strength of proof.	PI CA	Superficie en pieds carrés.
	Number of packages.  Volume in square feet of 1/4 inch	QTL	Nombre en quintal en poids de 100 livres.
	in thickness.	QTL N	Poids du contenu en quintal de 100
	Area in square feet.		livres (récipients exclus).
	Area in square yards.	TONNE	Poids en tonnes courtes de 2,000 livres.
	Weight in short tons of 2,000 lb.	VG CA	Superficie en verges carrées.
TR OZ	Weight in troy ounces.		

#### KEY TO ABBREVIATIONS OF COUNTRIES

Note: The classification of Countries with a statement of the territorial limits used for statistical purposes will be found in the annual Volume III, Imports 1959-1960, Catalogue No. 65-203. Amendments effective in any year are listed in the January report for that year.

# Value, Price and Volume Indexes of Imports

This report continues the publication, begun in January 1964, of the value, price and volume indexes of imports arranged according to the sections of the Import Commodity Classification. Sections I-V are fully represented in the indexes; no price or volume indexes are calculated for Section VI because of the heterogeneous nature of this section; and Section VII, which is not included in import value totals, is completely excluded.

The declared value indexes are based on a re-grouping of 1948 values into the sections of the new classification. The price index is based on a re-arrangement of the individual price lines used in calculating the original 1948—based index, retaining, with some small changes, the original 1948 weighting pattern. The volume index is derived by dividing the value index by the corresponding price index.

# Indices de la valeur, des prix et du volume des importations

Ce rapport fait suite à la publication, commencée en janvier 1964, des indices de la valeur, des prix et du volume des importations, disposés d'après les sections de la Classification des marchandises d'importation. Les Sections I—V sont entièrement couvertes par ces indices; aucun indice de prix ou de volume n'est calculé pour la Section VI en raison de la nature hétérogène des marchandises qui la composent; d'autre part, la Section VII, qui n'est pas comprise dans le total des valeurs à l'importation, est complètement excluse des indices.

Les indices de la valeur déclarée se fondent sur les valeurs de 1948 regroupées d'après les sections de la nouvelle classification. L'indice des prix repose sur une redistribution des lignes individuelles de prix qui ont servi au calcul de l'indice de base de 1948; sauf quelques changements d'importance secondaire, la pondération s'est faite à l'aide du système initial de 1948. L'indice du volume s'obtient en divisant l'indice de la valeur par l'indice de prix correspondant.

#### **EXPLANATORY NOTES**

- Source of Data: Import documents collected by Customs are the basic source of import statistics, except for data on imports of electricity and on imports of aircraft imported for use as international carriers. These two types of imports are reported by the importing firms directly to the Dominion Bureau of Statistics.
- 2. Time Periods: Import statistics for any month include all goods declared on import entries received at DBS during the calendar month, and on electricity reports received within the following calendar month. There is usually a lapse of one to two weeks between the actual customs clearance of imports and receipt of the relevant documents in DBS. Electricity imports are usually included in statistics for the month in which these imports actually occurred. Reports on aircraft imported as international carriers are received quarterly, but the aircraft can usually be included in statistics for the month in which the imports actually occurred.
- 3. Coverage: From January 1, 1964, import statistics have included all goods which are cleared by Customs immediately on arrival in Canada, plus goods which are entered into customs warehouses on arrival. For 1963 and earlier years import statistics included goods cleared immediately on arrival plus goods cleared for consumption out of customs warehouses. The two types of record eventually cover the same totals, except for a small amount of goods which is entered into customs warehouses and then re-exported. There may, however, be an important difference in the time at which warehoused goods are recorded as imports; some shipments which enter customs warehouses remain there for several months before clearance. A more detailed discussion of this change appears on one of the blue pages included in the January. 1964 issue of this report.

The following commodity movements are excluded from import statistics (some are recorded separately as Special Transactions-Non-trade in Table 4): gold and gold products where the value of the gold content is 80% or more of the total value except for dental gold

### NOTES EXPLICATIVES

- 1. Source des données: La statistique des importations se fonde principalement sur les documents d'importation recueillis par les Douanes, sauf dans le cas des importations de l'électricité et les importations des avions devant servir de transporteurs internationaux. Ces deux catégories d'importations sont déclarées directement par les compagnies importatrices au Bureau fédéral de la statistique.
- 2. Périodes de temps: La statistique des importations pour un mois quelconque comprend toutes les marchandises déclarées dans les documents d'importation parvenus au B.F.S. durant le mois civil et dans les rapports sur l'électricité reçus durant le mois civil suivant. Il y a ordinairement un décalage d'une à deux semaines entre le dédouanement effectif des importations et l'arrivée des documents qui s'y rapportent au B.F.S. Les importations d'électricité sont ordinairement comprises dans la statistique du mois où elles ont effectivement eu lieu. Les rapports sur les avions importés comme transporteurs internationaux sont recus tous les trois mois, mais les avions peuvent ordinairement être inclus dans la statistique du mois où ils ont été importés.
- 3. Couverture: La statistique des importations comprend, depuis le 1er janvier 1964, toutes les marchandises dédouanées dès leur arrivée au Canada plus les marchandises entreposées à la douane à leur arrivée. Pour 1963 et les années antérieures, la statistique des importations comprend les marchandises dédouanées dès leur arrivée plus les marchandises dédouanées des entrepôts de la douane pour consommation. Eventuellement, les deux formes de documents donnent les mêmes chiffres, sauf dans le cas d'une petite quantité de marchandises entreposées à la douane et ensuite réexportées. Il peut y avoir, toutefois, une grande différence entre le moment où les marchandises sont entreposées et celui où elles sont consignées comme importations; certaines marchandises entreposées à la douane attendent leur dédouanement pendant plusieurs mois. Une explication plus détaillée du changement paraît sur l'une des pages bleues insérées dans le rapport de janvier 1964.

Les mouvements de marchandises suivants sont exclus de la statistique des importations (certains sont classés séparément comme Transactions spéciales-hors commerce au tableau 4): l'or et les articles en or dont la valeur de la teneur en or représente 80 p. 100 ou plus de la alloy (class 880-27) and a small amount of gold scrap in the form of jewellers' sweepings (class 258-99); current coin; settlers' effects; private donations and gifts; tourist purchases exempt from duty; goods imported by foreign armed forces or diplomats stationed in Canada or brought back by Canadian armed forces or diplomats returning from postings outside Canada; temporary imports for exhibition or competition, and most goods imported for Expo 67; and film imported for exhibition or processing or returned after exhibition or processing abroad; ships of British construction and registry imported for use in Canada, and ships purchased for use as international carriers but not used to carry goods between points in Canada; bunker supplies and ships' stores purchased by Canadian vessels or aircraft abroad; generally, all temporary imports and goods merely moving in transit through Canadian territory. Until January 1, 1966, aircraft purchased for use as international carriers and not used to carry goods between points in Canada were also excluded.

- 4. Countries Credited: Imports are credited to the country in which the goods were located when first directed to Canada, except for goods produced in Central or South America but first consigned to Canada from the United States, which are credited to the country of origin.
- 5. Quantities: Tables 3 and 4 show quantities in terms of the units specified for each class in the Import Commodity Classification, Vol. I (DBS Catalogue No. 12-524). Where no unit of quantity is specified, the quantity columns are empty.

Units of weight or volume relate to the weight or volume of the goods, and exclude the weight or volume of any packing required for shipment except in certain special cases otherwise defined in the Customs Tariff. Units of number refer to the number of complete (or substantially complete) units imported, excluding parts (for any class where the recorded value includes both complete units and parts of these units, the average value per complete unit can not be calculated). All units of quantity used in this report are defined on page 7.

valeur totale, sauf les alliages d'or dentaire (classe 880-27) et une petite quantité de déchets d'or sous forme de balayures de bijoutiers (classe 258-99); la monnaie courante; les effets d'immigrants; les dons et cadeaux privés; les achats des touristes exempts de douane; les marchandises importées par les forces armées ou les diplomates étrangers en poste au Canada ou rapportées par les forces armées ou les diplomates canadiens rentrant de leur service hors du Canada; les importations provisoires pour expositions et concours, et la plupart des marchandises importées aux fins de l'Expo 67; les films importés pour projection ou développement ou retournés à l'étranger après projection ou développement: les navires de construction et d'immatriculation britanniques importés pour usage au Canada, et les navires achetés pour usage comme transporteurs internationaux et non pour le transport de marchandises d'un endroit à un autre au Canada; les approvisionnements de soute et de bord achetés à l'étranger par les navires et les avions canadiens: en général toutes les importations provisoires et les marchandises ne faisant que passer par le territoire canadien. Jusqu'au 1er janvier 1966, les avions achetés comme transporteurs internationaux et non pour le transport de marchandises d'un endroit à un autre au Canada étaient aussi exclus.

- 4. Pays de provenance: Les importations sont créditées au pays où les marchandises étaient situées avant leur acheminement vers le Canada, sauf les marchandises produites en Amérique centrale ou en Amérique du Sud et expédiées au Canada des États-Unis, lesquelles sont attribuées au pays d'origine.
- 5. Quantités: Les tableaux 3 et 4 donnent les quantités suivant les unités déterminées pour chaque classe dans la "Classification des marchandises d'importation", vol. 1 (B.F.S. numéro de catalogue 12-524). Lorsque l'unité de quantité n'est pas mentionnée, les colonnes de quantité demeurent en blanc.

Les unités de poids ou de volume visent le poids ou le volume des marchandises à l'exclusion de l'emballage nécessaire à l'expédition, sauf dans certains cas spéciaux définis dans le tarif douanier. Les unités de nombre visent le nombre d'articles complets (ou suffisamment complets) importés, sauf les pièces de rechange (dans toute catégorie où la valeur inscrite comprend les unités complètes et leurs pièces, la valeur moyenne par unité complète ne peut être calculée). Toutes les unités de quantité employées dans le présent rapport sont expliquées à la page 7.

6. Values: The value of goods imported is usually the value as determined for customs duty. The Canadian Customs Act generally requires the valuation of goods f.o.b. point of shipment in the country of export, but at least in recent years importers have often reported c.i.f. values for free goods or goods subject to specific rates of duty. An effort is made to ensure that f.o.b. values are consistently used in import statistics in the following cases: goods subject to dumping duty (from January, 1959); raw cotton and crude petroleum (from January, 1962, retroactive to January, 1960); raw sugar (from January, 1963, retroactive to January, 1961); all shipments individually valued at \$50,000 or more (from January, 1965; when this check was introduced in January, 1964 it covered only shipments individually valued at \$100,000 or more). Only about one-quarter of the value of imports is covered by these specific checks.

All values appearing in this report are presented in thousands of dollars. Where the cumulative value of imports from a particular country in any commodity class is less than \$500., a line for that country is printed if a quantity is available and only the quantity is shown. Where the cumulative value is \$500. or more but the value for the current month is less than \$500, a line is printed but no value appears in the current month column. In such cases current month quantities are printed even though no value is shown for the month. All totals and cumulative values are calculated from unrounded figures and rounded independently; they will therefore often differ from the sum of the rounded figures shown in in the report.

- 7. Abbreviations: Many descriptions of countries and commodities used in this report are abbreviated or incomplete. A key to abbreviations of countries appears on page 8, and full descriptions of all commodities appear in the Import Commodity Classification, Vol. I. The letters "n.e.s." mean "not elsewhere specified".
- 8. **Revisions:** All statistics in this report are subject to revision. Revisions to previous reports are published on coloured pages at the beginning of this report quarterly.

6. Valeurs: Ordinairement, la valeur des marchandises importées est la valeur déterminée pour fins de droits de douane. La loi canadienne sur les douanes exige généralement l'évaluation des marchangises f. à b. au point d'expédition dans le pays exportateur mais, ces dernières années du moins, les importateurs ont souvent déclaré la valeur c.a.f. pour les marchandises en franchise ou les marchandises sujettes à un tarif déterminé. On s'efforce d'assurer que la valeur f. à b. soit régulièrement employée dans la statistique des importations suivantes: les marchandises suiettes au tarif de dumping (depuis janvier 1959); le coton brut et le pétrole brut (depuis janvier 1962, avec effet rétroactif à janvier 1960); le sucre brut (depuis janvier 1963 avec effet rétroactif à janvier 1961); toutes les expéditions évaluées à \$50,000 ou plus chacune (depuis janvier 1965; lors de l'introduction de ce contrôle, en janvier 1964, il ne s'appliquait qu'aux expéditions évaluées à \$100,000 ou plus chacune). Ces contrôles déterminés ne couvrent qu'un quart environ de la valeur des importa-

Toutes les valeurs qui paraissent dans le présent rapport sont indiquées en milliers de dollars. Lorsque la valeur cumulative des importations en provenance d'un pays en particulier dans une catégorie de marchandises est inférieure à \$500., une ligne apparaît dans le rapport si une quantite est disponible et la quantité seulement est indiquée. Lorsque la valeur cumulative est de \$500. ou supérieure mais, pour le mois en cours, inférieure à \$500., il y a une ligne au rapport mais aucune valeur ne paraît dans la colonne du mois en cours. Dans de tels cas, les quantités du mois en cours sont indiquées même si la valeur ne l'est pas. Tous les totaux et toutes les valeurs cumulatives sont calculés à partir de chiffres non arrondis et sont arrondis indépendamment en milliers de dollars: ils différeront donc souvent de la somme des chiffres arrondis du rapport.

- 7. Abréviations: Plusieurs descriptions de pays et de marchandises employées dans le présent rapport sont abrégées ou incomplètes. La clef aux abréviations des pays paraît à la page 9 et des descriptions complètes de toutes les marchandises paraissent dans la "Classification des marchandises d'importation", Vol. I. Les lettres "n.d.a." signifient "non dénommé ailleurs".
- 8. Rectifications: Toutes les données statistiques contenues dans le présent rapport sont sujettes à rectification. Les rectifications apportées aux rapports antérieurs paraissent dans les pages en couleur au début de ce rapport trimestriel.

## UNITS OF QUANTITY

## UNITÉS DE QUANTITÉ

BBL	Volume in barrels.	BOISS	Volume en boisseaux.
BU	Volume in bushels.		Volume en barils.
CARAT	Weight in carats.	CARAT	
CORD			Volume en cordes.
	Weight in units of 100 lb.		Nombre de douzaines.
CWTN	Weight of contents in units of 100 lb. (containers excluded).		Nombre de douzaines de paires.
DOZ	Number of dozens.		Volume en gallons canadiens.
DZ PR	Number of pairs in dozens.	GAL P	Volume du contenu alcoolisé en gallons canadiens de preuve.
FT	Length in linear feet.	GR	Nombre en grosses.
GAL	Volume in Canadian gallons.	KILO	Poids en kilogrammes.
GROSS	Number of gross.	LIV	Poids en livres.
	Weight in kilograms.	LIV N	Poids du contenu en livres (récipients exclus).
LB	Weight in pounds.	M	Nombre en milliers.
LB N	Weight of contents in pounds (containers excluded).	M KWH	Milliers de kilowatts-heure.
M	Number in thousands.	M PCU	Volume en milliers de pieds cubes.
мвг	Volume in thousand board feet.	м Р Р	Volume en milliers de pieds planche.
M C F	Volume in thousand cubic feet.	NOMB	Nombre.
M KWH	Thousand kilowatt hours.	ONCE	Poids en onces.
NO	Number.	ON TR	Poids en onces troy.
oz	Weight in ounces.	PAIRE	Nombre de paires.
PACK	Number of packs.	PAQ	Nombre de paquets.
PAIR	Number of pairs.	PC 1/4	Volume en pieds carrés de 1/4 de pouce d'épaisseur.
P GAL	Volume of alcoholic content in Canadian gallons of the	PI	Longueur en pieds linéaires.
	strength of proof.	PI CA	Superficie en pieds carrés.
	Number of packages.	QTL	Nombre en quintal en poids de 100
SF 1/4	Volume in square feet of 1/4 inch in thickness.		livres.
SQ FT	Area in square feet.	QTL N	Poids du contenu en quintal de 100 livres (récipients exclus).
SQ YD	Area in square yards.	TONNE	Poids en tonnes courtes de 2,000 livres.
TON	Weight in short tons of 2,000 lb.	WC CA	
TR OZ	Weight in troy ounces.	VG CA	Superficie en verges carrées.

### KEY TO ABBREVIATIONS OF COUNTRIES

Note: The classification of Countries with a statement of the territorial limits used for statistical purposes will be found in the annual Volume III, Imports 1959-1960, Catalogue No. 65-203. Amendments effective in any year are listed in the January report for that year.

#### Value, Price and Volume Indexes of Imports

This report continues the publication, begun in January 1964, of the value, price and volume indexes of imports arranged according to the sections of the Import Commodity Classification. Sections I-V are fully represented in the indexes; no price or volume indexes are calculated for Section VI because of the heterogeneous nature of this section; and Section VII, which is not included in import value totals, is completely excluded.

The declared value indexes are based on a re-grouping of 1948 values into the sections of the new classification. The price index is based on a re-arrangement of the individual price lines used in calculating the original 1948 — based index, retaining, with some small changes, the original 1948 weighting pattern. The volume index is derived by dividing the value index by the corresponding price index.

# Indices de la valeur, des prix et du volume des importations

Ce rapport fait suite à la publication, commencée en janvier 1964, des indices de la valeur, des prix et du volume des importations, disposés d'après les sections de la Classification des marchandises d'importation. Les Sections I—V sont entièrement couvertes par ces indices; aucun indice de prix ou de volume n'est calculé pour la Section VI en raison de la nature hétérogène des marchandises qui la composent; d'autre part, la Section VII, qui n'est pas comprise dans le total des valeurs à l'importation, est complètement excluse des indices,

Les indices de la valeur déclarée se fondent sur les valeurs de 1948 regroupées d'après les sections de la nouvelle classification, L'indice des prix repose sur une redistribution des lignes individuelles de prix qui ont servi au calcul de l'indice de base de 1948; sauf quelques changements d'importance secondaire, la pondération s'est faite à l'aide du système initial de 1948. L'indice du volume s'obtient en divisant l'indice de la valeur par l'indice de prix correspondant.

#### EXPLANATORY NOTES

- 1. Source of Data: Import documents collected by Customs are the basic source of import statistics, except for data on imports of electricity and on imports of aircraft imported for use as international carriers. These two types of imports are reported by the importing firms directly to the Dominion Bureau of Statistics.
- 2. Time Periods: Import statistics for any month include all goods declared on import entries received at DBS during the calendar month, and on electricity reports received within the following calendar month. There is usually a lapse of one to two weeks between the actual customs clearance of imports and receipt of the relevant documents in DBS. Electricity imports are usually included in statistics for the month in which these imports actually occurred. Reports on aircraft imported as international carriers are received quarterly, but the aircraft can usually be included in statistics for the month in which the imports actually occurred.
- 3. Coverage: From January 1, 1964, import statistics have included all goods which are cleared by Customs immediately on arrival in Canada, plus goods which are entered into customs warehouses on arrival. For 1963 and earlier years import statistics included goods cleared immediately on arrival plus goods cleared for consumption out of customs warehouses. The two types of record eventually cover the same totals, except for a small amount of goods which is entered into customs warehouses and then re-exported. There may, however, be an important difference in the time at which warehoused goods are recorded as imports; some shipments which enter customs warehouses remain there for several months before clearance. A more detailed discussion of this change appears on one of the blue pages included in the January. 1964 issue of this report.

The following commodity movements are excluded from import statistics (some are recorded separately as Special Transactions-Non-trade in Table 4): gold and gold products where the value of the gold content is 80% or more of the total value except for dental gold

#### NOTES EXPLICATIVES

- 1. Source des données: La statistique des importations se fonde principalement sur les documents d'importation recueillis par les Douanes, sauf dans le cas des importations de l'électricité et les importations des avions devant servir de transporteurs internationaux. Ces deux catégories d'importations sont déclarées directement par les compagnies importatrices au Bureau fédéral de la statistique.
- 2. Périodes de temps: La statistique des importations pour un mois quelconque comprend toutes les marchandises déclarées dans les documents d'importation parvenus au B.F.S. durant le mois civil et dans les rapports sur l'électricité reçus durant le mois civil suivant. Il v a ordinairement un décalage d'une à deux semaines entre le dédouanement effectif des importations et l'arrivée des documents qui s'v rapportent au B.F.S. Les importations d'électricité sont ordinairement comprises dans la statistique du mois où elles ont effectivement eu lieu. Les rapports sur les avions importés comme transporteurs internationaux sont recus tous les trois mois, mais les avions peuvent ordinairement être inclus dans la statistique du mois où ils ont été importés.
- 3. Couverture: La statistique des importations comprend, depuis le 1er janvier 1964, toutes les marchandises dédouanées dès leur arrivée au Canada plus les marchandises entreposées à la douane à leur arrivée. Pour 1963 et les années antérieures. la statistique des importations comprend les marchandises dédouanées dès leur arrivée plus les marchandises dédouanées des entrepôts de la douane pour consommation. Eventuellement, les deux formes de documents donnent les mêmes chiffres, sauf dans le cas d'une petite quantité de marchandises entreposées à la douane et ensuite réexportées. Il peut y avoir, toutefois, une grande différence entre le moment où les marchandises sont entreposées et celui où elles sont consignées comme importations; certaines marchandises entreposées à la douane attendent leur dédouanement pendant plusieurs mois. Une explication plus détaillée du changement paraît sur l'une des pages bleues insérées dans le rapport de janvier 1964.

Les mouvements de marchandises suivants sont exclus de la statistique des importations (certains sont classés séparément comme Transactions spéciales-hors commerce au tableau 4): l'or et les articles en or dont la valeur de la teneur en or représente 80 p. 100 ou plus de la

alloy (class 880-27) and a small amount of gold scrap in the form of jewellers' sweepings (class 258-99); current coin; settlers' effects; private donations and gifts; tourist purchases exempt from duty; goods imported by foreign armed forces or diplomats stationed in Canada or brought back by Canadian armed forces or diplomats returning from postings outside Canada; temporary imports for exhibition or competition, and most goods imported for Expo 67; and film imported for exhibition or processing or returned after exhibition or processing abroad; ships of British construction and registry imported for use in Canada, and ships purchased for use as international carriers but not used to carry goods between points in Canada: bunker supplies and ships' stores purchased by Canadian vessels or aircraft abroad; generally, all temporary imports and goods merely moving in transit through Canadian territory. Until January 1, 1966, aircraft purchased for use as international carriers and not used to carry goods between points in Canada were also excluded.

- 4. Countries Credited: Imports are credited to the country in which the goods were located when first directed to Canada, except for goods produced in Central or South America but first consigned to Canada from the United States, which are credited to the country of origin.
- 5. Quantities: Tables 3 and 4 show quantities in terms of the units specified for each class in the Import Commodity Classification, Vol. I (DBS Catalogue No. 12-524). Where no unit of quantity is specified, the quantity columns are empty.

Units of weight or volume relate to the weight or volume of the goods, and exclude the weight or volume of any packing required for shipment except in certain special cases otherwise defined in the Customs Tariff. Units of number refer to the number of complete (or substantially complete) units imported, excluding parts (for any class where the recorded value includes both complete units and parts of these units, the average value per complete unit can not be calculated). All units of quantity used in this report are defined on page 7.

valeur totale, sauf les alliages d'or dentaire (classe 880-27) et une petite quantité de déchets d'or sous forme de balayures de bijoutiers (classe 258-99); la monnaie courante; les effets d'immigrants; les dons et cadeaux privés; les achats des touristes exempts de douane; les marchandises importées par les forces armées ou les diplomates étrangers en poste au Canada ou rapportées par les forces armées ou les diplomates canadiens rentrant de leur service hors du Canada; les importations provisoires pour expositions et concours, et la plupart des marchandises importées aux fins de l'Expo 67; les films importés pour projection ou développement ou retournés à l'étranger après projection ou développement; les navires de construction et d'immatriculation britanniques importés pour usage au Canada, et les navires achetés pour usage comme transporteurs dises d'un endroit à un autre au Canada; les approvisionnements de soute et de bord achetés à l'étranger par les navires et les avions canadiens; en général toutes les importations provisoires et les marchandises ne faisant que passer par le territoire canadien. Jusqu'au 1er janvier 1966, les avions achetés comme transporteurs internationaux à un autre au Canada étaient aussi exclus.

- 4. Pays de provenance: Les importations sont créditées au pays où les marchandises étaient situées avant leur acheminement vers le Canada, sauf les marchandises produites en Amérique centrale ou en Amérique du Sud et expédiées au Canada des États-Unis, lesquelles sont attribuées au pays d'origine.
- 5. Quantités: Les tableaux 3 et 4 donnent les quantités suivant les unités déterminées pour chaque classe dans la "Classification des marchandises d'importation", vol. 1 (B.F.S. numéro de catalogue 12-524). Lorsque l'unité de quantité n'est pas mentionnée, les colonnes de quantité demeurent en blanc.

Les unités de poids ou de volume visent le poids ou le volume des marchandises à l'exclusion de l'emballage nécessaire à l'expédition, sauf dans certains cas spéciaux définis dans le tarif douanier. Les unités de nombre visent le nombre d'articles complets (ou suffisamment complets) importés, sauf les pièces de rechange (dans toute catégorie où la valeur inscrite comprend les unités complètes et leurs pièces, la valeur moyenne par unité complète ne peut être calculée). Toutes les unités de quantité employées dans le présent rapport sont expliquées à la page 7.

6. Values: The value of goods imported is usually the value as determined for customs duty. The Canadian Customs Act generally requires the valuation of goods f.o.b. point of shipment in the country of export, but at least in recent years importers have often reported c.i.f. values for free goods or goods subject to specific rates of duty. An effort is made to ensure that f.o.b. values are consistently used in import statistics in the following cases: goods subject to dumping duty (from January, 1959); raw cotton and crude petroleum (from January, 1962, retroactive to January, 1960); raw sugar (from January, 1963, retroactive to January, 1961); all shipments individually valued at \$50,000 or more (from January, 1965; when this check was introduced in January, 1964 it covered only shipments individually valued at \$100,000 or more). Only about one-quarter of the value of imports is covered by these specific checks.

All values appearing in this report are presented in thousands of dollars. Where the cumulative value of imports from a particular country in any commodity class is less than \$500., a line for that country is printed if a quantity is available and only the quantity is shown. Where the cumulative value is \$500, or more but the value for the current month is less than \$500, a line is printed but no value appears in the current month column. In such cases current month quantities are printed even though no value is shown for the month. All totals and cumulative values are calculated from unrounded figures and rounded independently; they will therefore often differ from the sum of the rounded figures shown in in the report.

- 7. Abbreviations: Many descriptions of countries and commodities used in this report are abbreviated or incomplete. A key to abbreviations of countries appears on page 8, and full descriptions of all commodities appear in the Import Commodity Classification, Vol. I. The letters "n.e.s." mean "not elsewhere specified".
- 8. **Revisions**: All statistics in this report are subject to revision. Revisions to previous reports are published on coloured pages at the beginning of this report quarterly.

6. Valeurs: Ordinairement, la valeur des marchandises importées est la valeur déterminée pour fins de droits de douane. La loi canadienne sur les douanes exige généralement l'évaluation des marchandises f.àb. au point d'expédition dans le pays exporta teur mais, ces dernières années du moins, les importateurs ont souvent déclaré la valeur c.a.f. pour les marchandises en franchise ou les marchandises sujettes à un tarif déterminé. On s'ef force d'assurer que la valeur f. à b. soit régulière ment employée dans la statistique des importations suivantes: les marchandises sujettes au tarif de dumping (depuis janvier 1959); le coton brut et le pétrole brut (depuis janvier 1962, avec effet ré troactif à janvier 1960); le sucre brut (depuis janvier 1963 avec effet rétroactif à janvier 1961) toutes les expéditions évaluées à \$50,000 ou plus chacune (depuis janvier 1965; lors de l'introduction de ce contrôle, en janvier 1964, il ne s'appli quait qu'aux expéditions évaluées à \$100,000 ou plus chacune). Ces contrôles déterminés ne couvrent qu'un quart environ de la valeur des importa tions.

Toutes les valeurs qui paraissent dans le présen rapport sont indiquées en milliers de dollars. Lorsque la valeur cumulative des importations en provenance d'un pays en particulier dans une catégorie de marchandises est inférieure à \$500., une ligne apparaît dans le rapport si une quantité est dis ponible et la quantité seulement est indiquée Lorsque la valeur cumulative est de \$500, ou supérieure mais, pour le mois en cours, inférieure à \$500.. il y a une ligne au rapport mais aucune valeur ne paraît dans la colonne du mois en cours Dans de tels cas, les quantités du mois en cours sont indiquées même si la valeur ne l'est pas Tous les totaux et toutes les valeurs cumulatives sont calculés à partir de chiffres non arrondis e sont arrondis indépendamment en milliers de dollars: ils différeront donc souvent de la somme des chiffres arrondis du rapport.

- 7. Abréviations: Plusieurs descriptions de pays et de marchandises employées dans le présent rappor sont abrégées ou incomplètes. La clef aux abrévia tions des pays paraît à la page 9 et des descrip tions complètes de toutes les marchandises parais sent dans la "Classification des marchandise d'importation", Vol. I. Les lettres "n.d.a." signi fient "non dénommé ailleurs".
- Rectifications: Toutes les données statistique contenues dans le présent rapport sont sujettes rectification. Les rectifications apportées au rapports antérieurs paraissent dans les pages e couleur au début de ce rapport trimestriel.

# UNITS OF QUANTITY

# UNITÉS DE QUANTITÉ

BBL	Volume in barrels.	BOISS	Volume en boisseaux.
BU	Volume in bushels.	BRL	Volume en barils.
CARAT	Weight in carats.	CARAT	Poids en carats.
CORD	Volume in cords.	CORDE	Volume en cordes.
CWT	Weight in units of 100 lb.	DOUZ	Nombre de douzaines.
CWT N	Weight of contents in units of 100 lb. (containers excluded).		Nombre de douzaines de paires.
DOZ	Number of dozens.		Volume en gallons canadiens.
DZ PR	Number of pairs in dozens.	GAL P	Volume du contenu alcoolisé en gallons canadiens de preuve.
FT	Length in linear feet.	GR	Nombre en grosses.
GAL	Volume in Canadian gallons.	KILO	Poids en kilogrammes.
GROSS	Number of gross.	LIV	Poids en livres.
	Weight in kilograms.	LIV N	Poids du contenu en livres (récipients exclus).
LB	Weight in pounds.	M	Nombre en milliers.
LB N	Weight of contents in pounds (containers excluded).	M KWH	Milliers de kilowatts-heure.
М	Number in thousands.	M PCU	Volume en milliers de pieds cubes.
M B F	Volume in thousand board feet.	м Р Р	Volume en milliers de pieds planche.
M C F	Volume in thousand cubic feet.	NOMB	Nombre.
M KWH	Thousand kilowatt hours.	ONCE	Poids en onces.
NO	Number.	ON TR	Poids en onces troy.
oz	Weight in ounces.	PAIRE	Nombre de paires.
PACK	Number of packs.	PAQ	Nombre de paquets.
PAIR	Number of pairs.	PC 1/4	Volume en pieds carrés de 1/4 de pouce d'épaisseur.
P GAL	Volume of alcoholic content in Canadian gallons of the strength of proof.	РІ	Longueur en pieds linéaires.
PKC	Number of packages.	PI CA	Superficie en pieds carrés.
	Volume in square feet of 1/4 inch	QTL	Nombre en quintal en poids de 100 livres.
SQ FT	in thickness.  Area in square feet.	QTL N	Poids du contenu en quintal de 100 livres (récipients exclus).
SQ YD	Area in square yards.	TONNE	Poids en tonnes courtes de 2,000
	Weight in short tons of 2,000 lb.		livres.
	Weight in troy ounces.	VG CA	Superficie en verges carrées.

#### KEY TO ARREVIATIONS OF COUNTRIES

Note: The classification of Countries with a statement of the territorial limits used for statistical purposes will be found in the annual Volume III, Imports 1959-1960, Catalogue No. 65-203. Amendments effective in any year are listed in the January report for that year.

312 542	Aden	Korea, South	564	Vorce South

# Value, Price and Volume Indexes of Imports

This report continues the publication, begun in January 1964, of the value, price and volume indexes of imports arranged according to the sections of the Import Commodity Classification. Sections I—V are fully represented in the indexes; no price or volume indexes are calculated for Section VI because of the heterogeneous nature of this section; and Section VII, which is not included in import value totals, is completely excluded.

The declared value indexes are based on a re-grouping of 1948 values into the sections of the new classification. The price index is based on a re-arrangement of the individual price lines used in calculating the original 1948 — based index, retaining, with some small changes, the original 1948 weighting pattern. The volume index is derived by dividing the value index by the corresponding price index.

# Indices de la valeur, des prix et du volume des importations

Ce rapport fait suite à la publication, commencée en janvier 1964, des indices de la valeur, des prix et du volume des importations, disposés d'après les sections de la Classification des marchandises d'importation. Les Sections I—V sont entièrement couvertes par ces indices; aucun indice de prix ou de volume n'est calculé pour la Section VI en raison de la nature hétérogène des marchandises qui la composent; d'autre part, la Section VII, qui n'est pas comprise dans le total des valeurs à l'importation, est complètement excluse des indices.

Les indices de la valeur déclarée se fondent sur les valeurs de 1948 regroupées d'après les sections de la nouvelle classification. L'indice des prix repose sur une redistribution des lignes individuelles de prix qui ont servi au calcul de l'indice de base de 1948; sauf quelques changements d'importance secondaire, la pondération s'est faite à l'aide du système initial de 1948. L'indice du volume s'obtient en divisant l'indice de la valeur par l'indice de prix correspondant.
